

Marketing Funnel & Conversion Performance Analysis Report

This dashboard analyzes customer behavior across the marketing funnel and evaluates conversion performance, revenue generation, and business opportunities.

Key KPIs

- Total Sessions: 10,000
- Total Purchases: 1,004
- Conversion Rate: 10.04%
- Drop-Off Rate: 89.96%
- Total Revenue: 277.32K
- Average Order Value (AOV): 276

Dashboard Analysis

Customer Conversion Funnel: Out of 10,000 sessions, only 1,004 resulted in a purchase. The largest drop-off occurs between browsing and purchasing stages.

Revenue by Channel: Google Ads generated the highest revenue, followed closely by Email, Social Media, and Organic traffic.

Purchase Distribution by Channel: Purchases are fairly balanced across all channels, indicating diversified marketing performance.

Revenue by Product Category: Electronics generated the highest revenue, followed by Fashion and Sports.

Revenue by Region: South generated the highest revenue, while West generated the lowest.

Revenue Trend Over Time: Revenue fluctuated throughout the month, showing varying customer demand and purchasing behavior.

Business Insights

1. Only 10.04% of sessions convert into purchases.
2. Nearly 90% of users leave before completing a purchase.
3. Google Ads is the strongest revenue-generating channel.
4. Electronics is the top-performing product category.
5. South is the highest-performing region by revenue.
6. Revenue shows noticeable fluctuations across the month.

Recommendations

- Improve checkout and cart experience to reduce drop-offs.
- Use remarketing campaigns for abandoned sessions.
- Continue investing in high-performing channels such as Google Ads.
- Promote top-performing categories like Electronics.
- Replicate successful strategies from the South region in other regions.
